Door handles and accessories
edition 2024

APRILE

STILE

 **STERK**

There is no other interior design element that we have such a close relationship with as door handles. We touch them countless times each and every day. Therefore, I believe that choosing that one, perfect model should not be left up to chance.

The catalogue you are holding was created to help you make the right decision. The following pages feature a curated selection of door handle models from three different collections. I believe that with such a wide range of forms, materials and functional solutions, you will find your dream product.

A handwritten signature in black ink, appearing to be 'Ker', is centered within a light gray rectangular box.

ENGER – THE POWER OF DETAILS

ENGER – manufacturer and general distributor of APRILE, STILE and STERK door handles and accessories.

The last twenty-seven years have seen ENGER undergo a huge evolution – from a Polish family business to a design brand present on twenty-five markets, from a distributor of door handles sourced from other manufacturers to a company manufacturing its own collections and designs created by award-winning designers.

The transformation has always been driven by the ambition and courage of Robert Kwiecień, the ability to listen to the market's needs and great perseverance in searching for the best solutions.

The company motto “The power of details” embodies everything we do.

The quality of our products can be measured by the class of every detail and the complete understanding of our customers' expectations. We believe that details sepaarte something good and perfection.

OUR VALUES

AWARENESS

Working together with renowned architects, designers and opinion-forming media we build awareness of how important first-rate design is in everyday life.

COMFORT

Thanks to our awareness of changing functional and aesthetic needs we can not only offer great products, but also the comfort that our customers can enjoy throughout the entire process.

COMPLEMENTING NEEDS

A wide range of forms, finishes and functional solutions gives you the opportunity to choose a specific product and achieve the desired effect.

COHESION

Our goal is to make ENGER door handles into a natural extension of the aesthetic choices of our customers and, at the same time, an integral part of the look of their homes.

CONFIDENCE

We guarantee each door handle we sell offers the highest level of workmanship and comfort.

28 years of experience

3 own brands

5 renowned designers

130 models of door handles
and door knobs

36 types of finishes

31 door handles designed
by Polish designers

4 production plants

14 awards and distinctions

We work with prominent Polish designers, such as Maja Ganszyniec, Jan Kochański, Krystian Kowalski, Tomek Rygalik and Maria Jeglińska-Adamczewska.

We don't limit ourselves to one style. Our design partners are chosen based on shared values: a passion for design, the ability to combine form and function, high standards of craftsmanship and attention to even the most minute details.

Together, we observe how needs change, both in terms of function and aesthetics, and offer innovative solutions and premium products.

photo: Tomasz Kuczma

MAJA GANSZYNIEC

Maja takes a comprehensive approach to the creation process. She always strives to find a sustainable solution, often relying on traditional craftsmanship to highlight the beauty of her favourite natural materials. In her work with many renowned companies she creates truly unique designs. This flair for design was appreciated by, among others, the Institute of Industrial Design, which awarded her the title of Designer of the Year in 2017.

MARIA JEGLIŃSKA-ADAMCZEWSKA

Maria Jeglińska-Adamczewska was born in Fontainebleau in 1983. In 2012, she founded her own Office for Design & Research. She completed Masters degree in industrial design at ECAL in 2007 and received a scholarship from the IKEA Foundation. She works on a wide range of projects, including industrial design, exhibition projects, and research-based design projects. She believes that research can provoke and generate new forms of responses and proposals in today's world. Her clients include Ligne Roset, Kvadrat, Plato, Trame, Vitra, Hermès, Puro hotels, Saint-Étienne Design Biennale, and the Museum of Modern Art in Warsaw.

JAN KOCHAŃSKI

Jan got his interest in design from home, where creating was his favourite childhood pastime. He turned his love for interior design and furnishings into an academic and professional career. Currently, he works on projects for some of the world's leading companies, and has received numerous awards for these efforts, such as the Wallpaper Design Award, Must Have Łódź Design, and Mazda Design.

KRYSTIAN KOWALSKI

Krystian was born into a family of artists. He specializes in designing furniture, whole spaces and building brand images. His goal is to align the product with the needs by observing trends and behaviours, as well as employing advanced technologies and comprehensive prototyping in his work. This allows him to create bold, well thought-out projects for leading companies in the furniture industry. Numerous prestigious awards won in Poland and abroad, including the iF Design Award 2017, FX International Design Award, and the German Design Award, serve as confirmation of the unique nature of his work.

TOMEK RYGALIK

Tomek lives and breathes design on several levels: as a designer, curator, creative director, mentor and educator of the next generation of designers, with extensive experience and a Ph.D., professor at Aalto University. It is his belief that design can change the world through graceful and useful forms. His unconventional approach attracts the largest companies in the world, and also allows him to cultivate strong ties with the artistic world. He is recognised with several prestigious international awards

DOOR HANDLES

REBIRTH OF BEAUTY

APRILE, a collection launched in 2017, embodies timeless beauty based on harmony and classical proportions. APRILE handles are made for customers looking for original, but balanced forms, far from pretentious design and fleeting trends. Premium materials, advanced technological processes and the experience of respected global manufacturers all come together to guarantee perfect workmanship and comfort in use of each handle bearing the APRILE logo.

Beauty takes many forms. It can be found in the wonders of nature, unique objects, as well as fleeting moments. In creating the APRILE brand, we reached for classical proportions and divisions. We chose shapes that feel natural to the human eye, combined unique sources of inspiration, and gave the whole a truly modern form. This is how we created our standards of beauty, which the juries of design competitions, such as Dobry Wzór 2018, Dobry Wzór 2019, Must Have 2022, or Dobry Wzór 2022, have also found compelling.

Handles from the APRILE collection are made of a zinc and aluminium alloy, ZnAl, and brass. The range is beautifully complemented by unique finishes: natural leather and black crystal.

www.aprilehandles.com

All APRILE handles have successfully passed tests at the Institute of Precision Mechanics, obtaining the 4th operational load category, the highest possible, and the 7th durability category, again the highest, which requires completing 200,000 work cycles. The above parameters are confirmed by a National Declaration of Functional Properties.

STILE

STYLISH DESIGN

This collection, launched in 2018, puts the user's needs first. Handles from this family are 100% made of aluminium. They exhibit extraordinary manufacturing precision, durability, as well as forms that are functional and carefully thought-out. The STILE collection is addressed to customers looking for an attractive and original design of the highest level.

www.stilehandles.com

All STILE handles have successfully passed tests at the Institute of Precision Mechanics, obtaining the 4th operational load category, the highest possible, and the 7th durability category, again the highest, which requires completing 200,000 work cycles. The above parameters are confirmed by a National Declaration of Functional Properties.

A CHOICE FOR YEARS

The collection, produced since 2018, epitomises a high production standard, excellent material quality, and guarantees a favourable price. Thanks to a simple and universal design, it naturally complements any space, its function and its style, which is why it is frequently chosen by investors.

The STERK collection comprises stainless steel door handles, sliding door handles and matching door stops.

www.sterkhandles.com

All STERK handles have successfully passed tests at the Institute of Precision Mechanics, obtaining the 4th operational load category, the highest possible, and the 7th durability category, again the highest, which requires completing 200,000 work cycles. The above parameters are confirmed by a National Declaration of Functional Properties.
